

Completing your Practice Improvement Plan

Name:

CPSO#:

To complete your Practice Improvement Plan, you are asked to reflect on and outline 4 components:

1

Develop a Problem Statement:

- What is the issue you have identified? i.e. what is the problem you are trying to solve?
- What baseline measurement or data do you have that demonstrates the problem? i.e. How do you know this problem is a problem?
- Why is it important to solve this problem?

2

Develop an Intervention to Address the Problem:

- What specific solution could potentially resolve the problem?
- How will you implement the solution and over what timeline?

3

Develop Evaluation Plan to Monitor Success:

- What would successfully solving the problem look like? i.e. What is your target state?
- What are you going to specifically measure to monitor your progress and evaluate the results of your intervention? i.e. How will you know your intervention was successful?

4

Reflect on Quality of Care Impacts:

- What outcome(s) will be achieved by solving the problem? i.e. How will the solution to the problem improve the quality of care in your practice?
